Kampers combine Science and Art to preserve and protect our local wildlife at Kritter Kamp thanks to a grant from The Blanche Davis Moore Foundation

Why is it so hard to sneak up on a dragon fly? Find out at Kamp....

Join us the week of June 16, 2008 at Kritter Kamp, where students will use the sun to make a nature art project, create their nature journals with photographs, and go on a walk in the wetlands.

Kritter Kamp is leading campers through an entertaining environmental education experience inspired by Science and Art. Campers will learn about the life cycle of a butterfly, become environmental artists, take a walk on the wetlands on campus, and take photos of Coastal Bend wildlife in their natural habitats in order to better understand the importance of conservation and preservation of our Coastal Bend krittters. Plus much more! **Pre-registration ends June 1st.** Registration information and forms are available online at www.wildlifephotcontest.com

Do You Know...

- **What is the favorite food of the javelina?**
- **The difference between an insect and a bug?**
- **What is the life cycle of the butterfly is called?**
- **Why are earthworms beneficial to gardeners?**

Find these answers and more at camp!
